# Precise results in record time.

Engineering developments to build with quality, minimizing work deadlines and budgets.  
On-site surveys, model generation and drawing extraction.

## SOME APPLICATIONS

- ✓ 2D drawings as built.
- ✓ Final 3D model (BIM).
- ✓ Remodeling of facilities.
- ✓ Lay-Out changes.
- ✓ Scanning for asset management.

## DELIVERABLES DOCUMENTS

- ✓ Point cloud.
- ✓ BIM model.
- ✓ 2D drawings
- ✓ Videos and animations
- Virtual reality.

## Latest generation equipment

### Faro focus 3D X 330

Extended scanning, 330m range, easy positioning, built-in GPS receiver, and external scanning capability.

### LEICA GEOSYSTEM, BLK360°

Observe, design and interact in virtual reality.

# Capture, Processing and Modeling

Let us collaborate with you. delivering your project accurately, on time and assisting with BIM / CAD consulting, content creation and production.

**Scan and Points  
Cloud**

**3D  
modeling**

**Smart 3D  
mockup**

## Our services

### ENGINEERING AND PROJECTS

- Basic and detailed engineering
- Surveys, documentation supports and plans.
- Projects and works management.
- Energy inspections and infrastructure works.

### WORKSHOP MANUFACTURING AND REPAIRING

- Manufacture and assembly of process equipment (boilermaking) and packaged.
- Manufacture and installation of electrical panels.
- Industrial and hand tools repairing and maintenance.

### HUMAN RESOURCES MANAGEMENT

- Porvision of technical personnel in all ingeneerring disciplines.
- From our offices, in the client´s of remotely (HomeOffice).
- Prior selection process and analysis of the resource based on the client´s needs and requeriments.
- We provide adequate resouces for the achievement of the company´s and project´s objectives.
- Our main goals is to increase and improve or client´s competitiveness.

## INDUSTRIAL SERVICES

- Electromechanical maintenance in general.
- Motocompressors and screw compressors service.
- 0 to 1000 Kva. Generators services gasoline and diesel engines service.
- Services to gasoline and diesel engines.
- Substations service
- Plant facilities.
- Assistance services whit teams of technicians specialized in works, plan shutdowns, h/h services for administration, etc.

## WORKS AND ASSEMBLIES

- Assembly of welded and bolted tanks (API650 and AWWA).
- Assembly of insulation in pipes and process equipment.
- Electromechanical assemblies: machinery and production lines.
- Renewable energy.
- HDPE pipes, carbon and stainless steel.
- Assembly of substation, and PAT systems.
- Precommissioning and start up.

## ABOUT US

Ingenera is a company dedicated to the provision of engineering services, equipment manufacturing and assembly. We take on EPC and EPCM projects, developing engineering solutions in industrial projects.

We provide comprehensive Engineering and Management solutions allowing our clients to orient their efforts in those activities that are

their main business, generating synergy between Ingenera and its clients to achieve the best results with their projects.

We are persuaded that engineering is essential for the development of our society by improving the quality of life with corporate social responsibility and a strong commitment in caring for the environment.

## STRATEGIC ALLIANCES
